Empresa e Innovación

Dirección General de Industria,  
Energía y Minas

EUROPEAN UNION

Action aimed at promoting the energy efficiency and the use of renewable energies,  
co-financed by the European Regional Development Fund (ERDF) and Region de Murcia:

- **Photovoltaic Installation of Self-consumption** of 72.8 kWp, through the installation of photovoltaic solar panels in order to reduce energy consumption from the electrical grid as well as to reduce CO2 emissions released into the atmosphere.

- **Objective:** To promote the use of renewable energies by companies, particularly SMEs.
- **Annual energy savings:** 4.83 toe/year
- **Savings in GHG emissions per year:** 19.56 tCO2
- **Processing status:** Granted
- **Total investment made:** 56.926,33 €
- **Financial support from the European Union:** 15.200,58 €
